

Chapter 15-: Special Evolution

(TL By GUST)

"Evolution has been established.

[Race] evolves into [Race] .

[Title] has been confirmed.

Satisfied special evolution conditions.

[Title] It is possible to evolve into by possessing "Sage".

[Title] has been confirmed.

Satisfied special evolution conditions.

[Title] It is possible to evolve into by possessing "Friend of High Elf".

(TL: Torrent is Terrant here but we calm it Torrent because author wants us to)

At the moment of selection, characters flow on the screen.

According to it, as I had expected, I could evolve into a race called "Torrent".

"Torrent" is a moving tree that is also called a "tree person". The one who usually looks like a tree when it's not moving.

After all, it seems that it was the correct answer that it did not evolve at Sefi's house.

If you suddenly become a "torrent" and the volume weight increases significantly, the house will break or the floor will fall out.

However, it seems that I will not evolve into just a "torrent".

In addition, the characters on the screen weren't over yet.

"[Title]" High Elf's Friend "has been confirmed.

Confirmed possession of [divinity value].

[Divinity value] By consuming "10", you can raise the rank of the special evolution .

[Divinity value] is insufficient.

We have confirmed the [Title] that can be returned.

[Title] You can return "Thinking Grass" and get [Divinity Value] "5".

[Title] Do you want to give back "Thinking Grass"?

Yes, No

To be honest, I don't know what it is, but "Thinking Grass" should have had no special effect. Then

it wouldn't be a problem to lose it.

□I chose "yes".

"[Title]" Thinking grass "is reduced to [Divinity value].

□[Divinity value] Obtained "5".

□[Divinity value] By consuming "10", you can raise the rank of the special evolution .

□Do you want to consume [divinity value]?

□□Yes, No□

□If you select "Yes" here, the special evolution to "Manatrent" and the rank rise will start.

□Another special evolution destination is "Torrent Wiseman", but which one should you choose?

□Somehow, I could roughly understand which evolution would be what.

"Torrent Wiseman" specializes in magic. Perhaps this is also instinctively engraved information, I feel that magical attack methods will be expanded.

□for.

"Manatrent" may be said to be a more spiritual evolution, the spirits worshipped by the elves, the sacred tree in which it resides, and the existence of the previous stage. If it evolves smoothly, I will eventually become a spirit.

□If you think about the future of evolution, "Manatrent" will eventually become a stronger existence.

□However, if you want the fighting ability as a single unit, "Torrent Wiseman" is overwhelmingly superior.

□In addition, there is no certainty that I can evolve smoothly, so I feel that choosing "Torrent Wiseman" is the correct answer in terms of survival strategy.

□But the choice here was already been decided.

□Special evolution.

□It is possible to raise the rank further.

□I don't know the details, but it shouldn't be weak, and I could understand what kind of ability I would get as if "Torrent Wiseman" was found to be a magical specialist.

□And the ability gained by raising the rank of "Manatrent" determined my choice.

□I chose "Yes" when asked if I would consume [Divinity].

□at that moment--,

"Oh, oh! ??

□Evolution begins.

"Yug! ?? What did you do! ??

"I should be fine! Evolution is about to begin, so stay away from me Sefie!

□Sefie worriedly screams at my cry.

□I asked her to take a little distance while explaining not to worry about it.

□My body grows at a stretch as if I had timed that timing.

□The roots are deep and widespread, and each one grows thicker.

□The stem grows long and long, and its thickness can no longer be called a stem. Wrapped in brown bark, it's the trunk.

□Several branches grow from the thick and splendid trunk, and a large number of lush foliage grows beyond it.

"Foouooooo ~! !!

□I was looking up at myself with cheers as I was growing rapidly.

□There is a single tree in appearance.

□It's also lower than any tree in the elf village, and it's still small enough to be called a young tree.

□However, it will be large enough to be called a "tree". One of the trees that seems to be everywhere in an ordinary forest.

□However, if you have the feeling of being able to capture magical powers like me, Sephi, and the elves, the evaluation should be completely different.

□The root sucks up a large amount of magical elements from the earth, and magical power and vitality circulate in the trunk. At the tip of the spread branch, each lush leaf efficiently produces energy.

□The atmosphere I wear is of such a tree that makes me feel of something divine.

□Obviously, I feel the power that is unmatched before.

□For me, it seemed that my existence suddenly rose in stages.

□That's a change.

□And it turned into conviction by checking my status.

[Unique name] "Yugu"

[Race] Reiju / Manatrent

[Level] 1/50

[Vitality] 150/150

[Magic power] 230/230

[Skill] "Photosynthesis" "Magic Sensing" "Energy Drain" "Rhizome Generation" "Seed Generation"
"Ground vein improvement" "Mutation" "Possession" "Barrier"

[Attribute] Groundwater

[Title] "Sage" "Friend of High Elf"

[Divinity value] 3

□It seems that new skills are more effective than the various numbers that have risen.

□In addition, I have acquired a new water attribute, and I have a feeling that I can learn not only plant magic but also other magic.

Perhaps the rise of the rank of "Manatrent" is that "Reiju" is attached to the ethnic name.

□We should check the details in various ways, but anyway-it seems that it is much stronger than it was when it was a walking weed.

□But there are problems.

"Yugu has become fine"

"Hmm, right? You've evolved into a manatrent, right? Moreover, it's a spirit tree. "

□While being surprised, he responds to Sefie, who says a line like a relative's aunt, a little proudly.

□I don't want you to take it for granted.

□After all, it evolved into a torrent normally, but it has achieved a peculiar evolution of rank rise by special evolution. I think it's pretty good.

□However, Sefi is surprised but does not seem to be happy.

I Tilt my head,

"Yugu, won't you get tiny?"

□I heard such a thing.

"No, that's impossible"

□Now that I'm a fine tree, I don't think I can make this new body smaller.

□That is.

"Well ... Then, can't you enter Sefie's house anymore?"

□Sefi asks lonely.

□With this giant, you won't be able to live together in Sefi's house like you used to. That's for sure.

□But--

"no? I will continue to live with Sefi, right?"

"Huh? How?"

□As a matter of course, Sefi asks me with her eyes rounded.

□The answer was an ability that I could see before evolution-that is, the skill that made me decide to become a manatrent.

"Fufufufu, well, look"

□With that said, I activated the "seed generation" skill.

□At the same time, the newly acquired "mutation" skill will also be activated.

□Just activating "Seed Generation" will probably only produce seeds that will be "Torrent" or "Manatrent". So by using "mutation", I created seeds that would become "walking weeds".

□Then, the apple generated at the tip of the branch is dropped on the ground and germinated and grown by the magic of "Glow Plant".

□Then, what was born was a walking weed that looked almost the same as I was before evolution.

□After that, if you activate the skill of "possession" and specify it as a walking weed that has just created the target yorishiro--,

"If this is the case, can we live together as before?"

"Oo! Yugu has divided! ??"

□If you utter a telepathy with the body of Walking Weed, you could understand that this body has my consciousness. I stare at her with surprise.

□However, it is different from what Sefi calls division.

"I didn't split, I possessed my body."

"Hmm ... that's right"

□Sefie nods, but she probably don't understand this.

"Well, all you have to do is understand that I can live as usual."

"Oh! Then you know! It's good yay!"

□Sefie, who understood, bounced and was pleased.

□I am also relieved. It's kind of lonely to live alone outside now.

TL Note- So the cliffhanger is over and he evolved and No one was right in guessing it but the closest was Krazey with her guess of terrant but Yugu became a manaterant (Well technically it was right but different species is different species)
